1. FIVE AREAS OF DEVELOPMENT

Introduction to the Five Areas of Development - *a mainstream wholistic approach to existing alternative education models*

Pallavan Learning Systems has compiled a comprehensive list of online resources to help learners in their growth in all the Five Areas of Development.

[The Five Areas of Development](#) is a wholistic approach to learning that strives to break down the silos in education and ensure the development of a learner in all Five Areas of Development - Cerebral, Physical, Social, Emotional and Spiritual. Through this process of development, we hope to inspire our learners and equip them with the skills and processes that will help them navigate new content and challenges that the future might present. The Five Areas are:

- Cerebral Development teaches comprehension, critical thinking and curiosity and domain knowledge to enhance cognitive thinking
- Physical Development focuses on health, hygiene, fitness and sports
- Social Development supports students to get involved in their communities, work towards common goals and understand themselves and others
- Emotional Development encourages learners to pay attention to their emotions in order to identify, understand and express them positively and productively
- Spiritual Development is focused on core values, awareness and practice, rather than on a particular religion

Learners are obviously at the centre of everything we do. We encourage learners to co-create the curriculum with us and this curricular framework is organic and changes every year depending on the needs of the learner. Education is a lifelong process and the process is as important as the end result. Life itself is a journey of personal growth and development. The school environment should reflect the world around us. It should help the learner understand what is going on around him/her. Education should be about studying to learn and not learning to study. If we can help a learner understand the process of learning to learn, then teachers are in a better position to don the role of

facilitators and help in truly enhancing learning outcomes. This takes more precedence now than ever before as we move into a decade that does not resemble anything that we have witnessed in the past. This raises the question - how do we prepare our students for a future that at best seems 'unpredictable' and at its worst 'alien'? Education, just like us, needs to be dynamic, responsive, and open to new ideas and change. The Five Areas of Development curriculum factors in this dynamic nature of life and learners.

We hope you are able to contextualise the collated resources to aid your learners actualise their potential in all areas of development.

2. CEREBRAL DEVELOPMENT

Activities to promote Cerebral Development

Domain Area	Link / Website/Apps	Age Group	Free / Paid	Detailed Description
All Subjects	Elementary School Writing Apps and Websites Common Sense Education	All Ages	Free/ Paid	Elementary School Writing Apps and Websites
	https://www.stemez.com/	High School & above	Free	It is an encyclopedia of STEM education with 50,000 problems and solutions for 13 math subjects, 13 science and 13 engineering subjects and maths , physics for IIT JEE preparation. It is free and included in the National Digital Library of India.
	https://www.boclips.com	All Ages	Free	Boclips makes it easy to enrich learning experiences with high-quality, relevant educational videos from leading content providers — all in one place.

Student Leadership What are school systems doing to tide over the crisis?</p>

	<p>https://tergar.org/covid-19-message/</p>	<p>All ages</p>	<p>Free</p>	<p>COVID-19 is spreading throughout the world and creating major disruptions in many countries. Countless people are suffering. These are times that call forth the wisdom and compassion we nurture in meditation practice, as well as our capacity to hold the pain of the world as we navigate personal challenges. As Mingyur Rinpoche often says, awareness is the essence of meditation. What he means is that practicing meditation is a process of exploring the heart and mind, of fully experiencing the richness of awareness itself. This implies that meditation is not meant to eliminate the things we don't like about ourselves, or even to become "better" people. Meditation helps us to see that we are already whole and complete. It is a practical tool that enables us to get in touch with our true nature.</p>
	<p>http://atlasofemotions.org</p>	<p>All ages</p>	<p>Free</p>	<p>It is our hope that the Atlas, available at http://www.atlasofemotions.com/ will be fun to use and people will enjoy engaging with it. Exploring the Atlas may increase people's understanding of this vital feature in their life. We hope that teachers will use the Atlas in classrooms (it should be usable for people 9 years old+ without explanation) and that educators and therapists will use it with their clients to better understand themselves.</p>
	<p>https://centerhealthyminds.org</p>	<p>All ages</p>	<p>Free</p>	<p>Why does well-being matter and how are we measuring it?</p>

			<p>Researchers, including those at our Center, continue to investigate the factors that shape well-being. Rather than pitching a fixed scientific definition of well-being, we're constantly unearthing clues and evidence about how well-being manifests itself in the mind and body. It's not a static "thing" – but a set of skills that can be learned and cultivated over time, just like learning to play a musical instrument or riding a bike.</p>

	<p>https://www.smilingmind.com.au/</p>	<p>All ages</p>	<p>Free</p>	<p>Smiling Mind is a mobile app that aims to teach “mindfulness” to people of all ages through sessions of guided meditation of varying length. It contains a vast repertoire of programs aimed at different age groups (from ages 6-12, to teenagers, young adults, etc.) and different activities (school, daily commute, sport, relaxation, and more). The app is easy to navigate, and can begin a new program at any time, can be helpful for students who have difficulty concentrating in class, who experience outbursts of frustration and anger, or who just need a short boost of calming energy during the day.</p>

	https://vimeo.com/114619741	All ages	Free	<p>It demonstrates something called the Stress Relief Breath (SRB), which is a simple and powerful tool to use when in a stressful moment. One of the best ways to teach our children is to practice ourselves, so we can be great role models when it's needed the most. Here's to Making Healthy Choices and a stress-free home!</p>
	https://tergar.org/covid-19-message/	All years	Free	<p>COVID-19 is spreading throughout the world and creating major disruptions in many countries. Countless people are suffering. These are times that call forth the wisdom and compassion we nurture in meditation practice, as well as our capacity to hold the pain of the world as we navigate personal challenges.</p> <p>As Mingyur Rinpoche often says, awareness is the essence of meditation. What he means is that practicing meditation is a process of exploring the heart and mind, of fully experiencing the richness of awareness itself. This implies that meditation is not meant to eliminate the things we don't like about ourselves, or even to become "better" people. Meditation helps us to see that we are already whole and complete. It is a practical tool that enables us to get in touch with our true nature.</p>
	http://atlasofemotions.org	All years	Free	<p>It is our hope that the Atlas, available at http://www.atlasofemotions.com/, will be fun to use and people will enjoy engaging with it. Exploring the Atlas may increase people's understanding of this vital feature in their life. We hope that teachers will use the Atlas in classrooms (it should be usable for people 9 years old+</p>

				without explanation) and that educators and therapists will use it with their clients to better understand themselves.
	https://centerhealthyminds.org	All years	Free	<p>How does well-being matter and how are we measuring it?</p> <p>Researchers, including those at our Center, continue to investigate the factors that shape well-being. Rather than pitching a fixed scientific definition of well-being, we're constantly unearthing clues and evidence about how well-being manifests itself in the mind and body. It's not a static "thing" – but a set of skills that can be learned and cultivated over time, just like learning to play a musical instrument or riding a bike.</p>

8. SCHOOL SYSTEM RESOURCES

From nursery schools to further education colleges, colleagues have entrenched themselves in their communities, caring for the children of key workers and those at risk of harm while becoming distributors of food and providers of essential social care services.

Hundreds of thousands of teachers and support staff are busy at home trying to provide a support system for parents and a semblance of routine for children and young people. Many are reassuring those who would be providing online learning resources and marking coursework for students of applied qualifications. Educators are now shouldering an impossible task: to replicate the functions of school for months without an actual school building. Below are some links that explore how educators in different parts of the world are dealing with this crisis. Beneath those are links to various resources we have scoured and found useful. This is a list that we will be adding to as we navigate this new environment thrust upon all of us. We urge you to review these to verify applicability in your context before recommending them to your learners.
